

TECHNICAL SPECIFICATIONS

ROBOT DOG	
Model	X1
Upright Dimensions (L × W × H)	1000 × 470 × 1020mm
Prone Dimensions (L × W × H)	1130 × 470 × 590mm
Weight	72kg
Protection Level	Main Body IP67 + Upper Payload IP55
Endurance	3h
Continuous Travel Range	10km
Max Speed	4m/s
Max Step Height	20cm
Max Climbing Angle	45°
Operating Temperature	-20°C~55

NET LAUNCHER	
Projectile Type	Ultra-High Molecular Weight Polyethylene Net
E fective Capture Range	5-10m
Max Firing Count	500 shots
Shots per Charge	≥ 50 shots
Mesh Size	≤ 150mm
Deployed Net Size	2.4 × 2.4m

AI Patrol Net-Launch Robot Dog Pro

Smart Security Autonomous Patrol

PAYLOAD MOUNTING

CORE ADVANTAGES

Electromagnetic Net-Capturing for Active Response
The first electromagnetic net-capturing system integrated on quadruped robots

AI-Powered Autonomous Patrol
Supports real-time mapping, dynamic path planning, intelligent obstacle avoidance, and autonomous charging

Multimodal AI Precision Recognition
Accurately identifies people, vehicles, environmental risks, and abnormal behaviors

Real-Time Alerts + Closed-Loop Platform Response
AI delivers instant identification and automatic alerts to realize full-process closed-loop operation

Superior Protection & Long Battery Life
IP67-rated body and IP55-rated payload, with an endurance of up to 3 hours

Excellent Adaptability for All Scenarios
Capable of traversing complex terrains including sand, gravel, and muddy ground flexibly

CORE FUNCTIONS

Autonomous Patrol
Self-navigates along predefined patrol routes with auto-charging capability for continuous operation.

Accompanied Patrol
Supports moving alongside duty personnel for real-time collaborative patrol operations.

Panoramic Surveillance
Provides panoramic capture and automatic recording, supporting real-time on-site data transmission, post-event video review, and traceability.

AI Recognition
Supports multiple algorithms including facial recognition, license plate recognition, weapon-carrying behavior detection, and fire/smoke detection, and integrates with multimodal large models for accurate recognition.

Real-Time Alerts
Device abnormalities and AI-detected risks can be to the command platform in real time to trigger graded alert responses.

Automatic Targeting
Based on edge-computing capabilities, the vision system automatically locks onto key target areas to improve net-capture accuracy.

Intelligent Net Capture
Triple control modes—on-site, remote, voice-activated—for safe and effective target neutralization.

Voice Interaction
Equipped with a high-performance loudspeaker, supporting voice warnings and real-time public address to enhance on-site response.

Light Warning
Supports multiple light modes for on-site warning and safety guidance.

One-Click Emergency Call
The one-touch SOS button enables direct communication between the site and the command center.

APPLICATION SCENARIOS

Police Patrol

Continuous patrol to prevent risks such as weapon-carrying break-ins and abnormal gatherings

Security Duty

Rapid emergency response to protect personnel safety

Industrial Inspection

Intelligently identifies suspicious behaviors and triggers real-time alerts

Emergency Rescue

Crosses obstacles and approaches target areas for precise control
